

Caledonian Road Social Learning Area UCL

THE BRIEF

New Hall, Caledonian Road provides accommodation for 350 students within self-contained studios and ensuite rooms in cluster flats. Key to New Hall was the provision of common and social learning areas which incorporated student mailboxes. JPA Furniture was successful in supplying all the furniture for the social areas in this Halls of Residence.

Caledonian Road Social Learning Area UCL

THE SOLUTION

The design included glazed screens and sliding doors to create openness and space which complimented the monotone Mondrian style wall panelling with strong blocks of fabric colours on the seating and in the mailboxes.

The concept created specific areas for collaborative study and computer areas, sitting adjacent to the relaxed informal common areas, with high back chairs amongst open long sofas and causal stools.

THE IMPLEMENTATION

A key element in making this project successful was to ensure that the installation was completed on time for the start of the new academic year. JPA Furniture devised a plan and ensured that careful liaison with the client was maintained throughout the project.
